

Jeffersonville Railroad.

On and after Monday, July 12, 1886, trains on the Jeffersonville Railroad will leave Jeffersonville, opposite Louisville, at 6:30 A. M., 10:30 A. M., and 10 P. M., daily, Sundays excepted.

Connections made by the 10:50 A. M., and 10 P. M. trains at Seymour, with trains on the Ohio and Mississippi R. R., for St. Louis, Quincy, Cairo, Jefferson City, Kansas, Quincy, and Keokuk.

The 6:30 A. M., and 10 P. M. trains run through to Indianapolis, and form close connections with trains on the Terre Haute, Lafayette, Peru, Bellefontaine, and Indiana Central Railroads, for all the principal cities in the East, West, and North.

The 6:30 A. M., 10:50 A. M., and 10 P. M. trains connect at Seymour with trains on the Ohio and Mississippi Railroad for Cincinnati.

Only one change of cars between Louisville and Cincinnati, St. Louis or Chicago.

Baggage checked to all the principal cities. All changes of cars made by trains running into the same depot, thereby avoiding annoying Omnibus rides incidental to other routes leading from Louisville to the West and North.

Time as quick, and fare as low as by any other route.

Tickets sold to all points on the Mississippi and Missouri rivers. Also, to all the principal places in the East, West, and North.

Further information cheerfully given at the office of the Jeffersonville Railroad Co., No. 527 south east corner Main and Third streets, Louisville, Ky., or at the depot in Jeffersonville.

Several ordinance warrants were disposed of yesterday, in the City Court.

We had another glorious shower last night at 9 o'clock.

There is a dead dog lying on Green street, between Fourth and Fifth, that should be removed.

The case of the little negro girl, charged with having poisoned Mrs. Pope's family, will be tried on Monday next, in the City Court.

We call the attention of our readers to Mr. Holland's advertisement, of negro woman for sale.

A friend of ours who lost a valuable diamond ring, single stone, will give a very liberal reward for it, if left at his office.

Elder D. P. Henderson will preach at the Christian Church, corner of Walnut and Fourth, this morning, at 11 o'clock, and at night. Seats free.

MANLY.—On Friday afternoon, a man (?) knocked a woman down, near the corner of Clay and Green streets, and about dusk of the same day, another fellow was seen to knock a woman down, near Shelby street Mills, and on her several times severely.

In New York a man don't wear a hat unless it is made by Genin. In Louisville, it is said, one has few pictures worth a cent unless they come from Harris' Gallery. So the world wags, and such public opinion, whether true or false.

MORAY HALL.—We hardly think it necessary to do more than call our readers' attention to the opening of Moray Hall, to-morrow evening, in order to fill it full. Harry Chapman and his wife, old favorites, sustained by a good company, will make their appearance, and produce a very good summer bill, including, An Object of Interest, The Artful Dodger, and Beauty and the Beast. Go early.

We would call the special attention of dealers and the trade to the last and closing sale of a very extensive and general assortment of fashionable jewelry and fancy articles, at the auction rooms of Messrs. S. G. Henry & Co., to-morrow morning (Monday) at 10 o'clock. Their orders are imperative to clear out the entire lot. The articles will be arranged for inspection before the sale.

WOMEN'S ADVOCATE.—This is the name of a weekly paper published in Philadelphia, by Mrs. Annie E. McDowell, and devoted to the interests of the women who are forced to support themselves. Price \$2 per year. Mrs. Lydia J. Pierson, is corresponding editor. The paper is now nearly three years old, and may be considered well established.

FINE OLD BOURBON.—Mr. James A. Miller, of Millersburg, Bourbon county, Kentucky, left in his office yesterday, a sample of "twelve-year-old Bourbon." Calling in some of our friends who are first-rate judges, they tried it, and decided it to be the best article ever seen in this market.

Mr. Miller is now in the city on his way to New Orleans, and has left this article in store and for sale by Martin & Co. Those who will drink anyhow, we advise to get the twelve-year-old.

HIGHLAND RIFLES.—This company organized on Friday night, and elected the following officers: Captain, J. D. Pope; 1st Lieutenant, J. W. Winter; 2d Lieutenant, T. E. Dennis; 3d Lieutenant, W. H. Hendricks; 1st Sergeant, Jas. H. Baker; 2d Sergeant, W. N. Hardin; 3d Sergeant, H. Parker; 4th, J. Chapman; 1st Corporal, George Thompson; 2d Corporal, —; 3d Corporal, William Cole; 4th, Corp., A. G. Rudd. The company numbers 35 members.

John Schum was yesterday presented to Judge Johnston, charged with having stolen \$44.00 from Christ Hartman. Hartman lives on Clay between Market and Main. Schum was accused, he having been in the room just before the money was missed. Schum was held to bail in the sum of \$300, to answer an indictment for felony.

John Burk was presented to Judge Johnston, charged with being drunk and disorderly in his behavior. Burk is the person who was to his sister's funeral and committed so many outrages; jumping in the grave of his brother, who had been dead for a long time, and tearing his bones from the coffin, and holding them up for his mother to see. He was held to bail in the sum of \$300 for twelve months.

A POOR FELLOW. By the author of "Which? The Right or the Left?" New York: Dick & Fitzgerald.

This is essentially a religious novel, and as such well deserves a wide circulation. The foundation of the story is the conversion of a merchant who has amassed a large fortune by being wholly reckless as to the manner in which he did it. Though the character of this man is somewhat overdrawn, though he is made a much deeper villain than is necessary—the story will yet be to many an interesting one. We think the author has acted, also, by rendering his account of the religious meekness too diffuse; this, however, is a mere matter of taste, and instead of a fault may by many be deemed an additional motive for reading the work. The title "Poor Fellow," is the term used by one of the characters, a clergyman, when speaking of him abstractly.

For sale in this city, by Morton & Griswold.

Continuation of the Negro Case.

Dr. ALFRED FORTH: I made a post-mortem examination yesterday on the body of Jacob Hartline; the left temple bone is fractured, extending to the base of the brain; any great violence would have caused such a fracture; the blow was made by a broad piece of some hard substance; the scalp is not cut; a capstan bar would have made such a wound; Hartline's death was undoubtedly caused by this blow. [Dr. Forsyth examined the negro's head.] There are two wounds on the negro's head; the wound on the head is to the bone; Taylor has also, a wound on the forehead; it is not as serious as the wound on the one on his head.

Cross-examination: Saw no other wounds on the person of Hartline; decomposition had set in before the post-mortem examination began; Hartline died about two hours after he was brought to the Hospital.

The testimony for the defense was here introduced.

JOHN WARREN (f. m. c.) sworn: Am a fireman on the Alvin Adams—so is Taylor; we go off watch about six o'clock; we generally go off after eating supper, and at half past twelve Taylor was sitting up, when Hartline came up and hit him on the head with a capstan bar; Taylor wrenched the bar from Hartline's hand and struck him on the head, and knocked him up against the capstan; there was no intermission in the fight from beginning to end.

Cross-examination: The capstan bar is about seven feet long; one end, the big end, is square, the other end is round; when Taylor struck Hartline, Hartline was standing near the capstan; after Taylor struck the first blow, he turned as if going to leave, but whirled and struck Hartline a second time on the head; Taylor was bloody from his head to his feet.

PARELY HIRZ (A. L.) sworn: I have lived in Louisville since 1861; between seven and eight o'clock was standing aft on the harbor side of the boat; a white man came from the fore part of the boat, and struck Taylor, who was sitting near me; thought he was going to put the capstan bar away when I saw him approaching with it; when the white man struck Taylor on the head, he knocked him flat on his back; there was but one white man on the "faint" (stern) of the boat.

HENRY DUNCAN (A. L.) I belong to Mrs. Ray; was sitting by Taylor when Hartline came up and struck Taylor on the head; thought Hartline was striking at me; Hartline struck Taylor twice, and missed him once; Taylor didn't strike Hartline but once; could have seen if Taylor had struck more than once.

The testimony for the defense closed, and the case was argued by Mr. Baird for the defense, and Mr. Elliott for the prosecution. The case was submitted to the Court.

Judge Johnston, in giving his decision, said: Had Hartline, when the negro cursed him, have taken the bar and struck Taylor, and in the melee Taylor had wrenched it from Hartline and killed him with it, I should have found less difficulty in remaining the prisoner to answer a charge of murder; but too much time elapsed between the assault and the beginning of the fight (several hours having elapsed); therefore I hold John Taylor to bail in the sum of \$1,500, to answer an indictment for murder at the next term of the Jefferson Circuit Court. Messrs. Baird and Green for the defense.

As our paper, according to the Courier, is "a poor paper," we enrich its columns this morning by a few choice extracts, which the editor of the Courier will recognize.

MADAME BLANCHE.

The Botanical Physician, is still meeting with the same success in treating Curvature of the Spine, as well as all kinds of diseases of the Spine. The Madame also treats with great success all diseases of the Uterus, all diseases of the Skin, and the whole catalogue of chronic diseases.

For the next two months the Madame can be found at her office from 9 to 10 A. M.; the remainder of the day she can be found at her residence, on the Bardston turnpike, three miles from the city, at the Cedar Grove. Her name is at the gate.

CINCINNATI, July 5, 1886.

MADAME BLANCHE: Good fortune has attended me with the numbers that you selected in Swan's Lottery last summer. It was some time before I succeeded in getting them; at last I did, however, and the fifth time I got them drew the next little prize of \$30.00. It will be needless for me to try to describe my feelings of thankfulness to you and the lucky star that guided me to you. I was indeed a very poor man, with a family to support, and never made over one hundred dollars at a time. And now to have \$30.00, it seems almost too good to be real; but it is, for I have the money here before me; and if you can only have the prosperity and happiness that myself and family wish, you will indeed be happy. Publish this, if you like. Yours, gratefully, J. M. JACKSON.

GREAT BARGAINS IN FANCY DRESS GOODS.—I would respectfully invite the attention of ladies to my stock of summer dress goods, which I am offering at greatly reduced prices. My stock of lace mantillas, organdie muslin, jaconets, fancy silks, and embroideries, will be found very desirable. Strangers sojourning in our city are especially invited to examine my stock before making their purchases.

July 18 d. G. B. TABB.

THE CULTIVATION OF TEA.—A Washington correspondent says that the Agricultural Bureau of the Patent Office is making preparations to test the cultivation of tea in this country. The seed will be preserved in China specially for this purpose, planted in glass cases, and shipped in October. By the time of their arrival here they will have sufficiently sprouted to be set out in beds. After being tested here, the plants, if successful, will be distributed among the Southern States. An order for a great variety of seeds will also be sent to Egypt in a few days, through a house in London. This list includes wheat, barley, rice, clover (Trifolium Alexandrinum), &c.

FLA lady writing upon the subject, says: "When men break their hearts, it is the same as when a lobster breaks one of its claws—another sprouting immediately, and growing in its place."

A dog is a sentiment exhibited in the wag of a dog's tail, when waiting for a bone.

DAILY MARKETS.

All descriptions of merchandise pricing done at this office, promptly, and reasonably.

OFFICE OF THE DAILY LOUISVILLE DEMOCRAT, SATURDAY, JULY 17, 1886.

WHEAT AND GRAIN.—Small sales Flour at \$4.00; small sales of grain at market rates.

For the Louisville Democrat.

A Successful Effort to Reach Mammoth Cave.

Having just returned from Mammoth Cave, it is necessary to give relief to the redundancy of my feelings.

It will be remembered that I and I were rafting in Hermit Hollow, Jefferson county, while recovering from that steady rain, when I proposed to my friends to attempt the rafting, if any one would contribute a horse and buggy, a voyage for the Cave during so hot a June day would contribute ourselves, and make the hour of returning them the full light and benefit of our experience, so far as the powers of representation permitted. The force of this latter intimation succeeded, and, after the ordinary preliminaries, we found ourselves "armed and equipped," duly reposing under the inadequate canvas of umbrellas, and en route for Kentucky's king of chasms, animated with as much enthusiasm as ever was evinced by chivalric Sancho on a journey in the days of knight-hood; or perhaps with as laudable a zeal as Sir John with a jolly juno, ever exhibited over a bowl of sack. Our road led through—besides a number of incipient helmets—Mr. Washington, Shepherdville, Elizabethtown, and Munfordsville—over untraveled hills, ledges of at, ne, and fabled streams—to the brow of storming precipices and over the bosom of savannas—through barren districts, where the laborer's toil is unrequited, save by a sorry compromise between a crop of weeds and a lean growth of cyanoide, and through the fastnesses of primitive woods, along the wilds of which the silence is broken alone by the chirp of birds, the yell of beasts, or the peremptory shriek of victims to the assassin's dagger, a temperature of 95 deg., a clear sky, a road and country as suggested, and you have a PLEASURE TRIP to Mammoth Cave, Edmonson county, Kentucky. To realize it, in its breadth and scope, exhausts the resources of the most vigorous imagination. To call it a tour, in the pleasing, common acceptance of that term, is to tamper with the scenery and ease of a community, and to present one's self dangerous to the peace of that respectable body of philological savans who compile English lexicons. The place might be delineated briefly, and with justice, it seems to me, something in this wise: "The Mammoth Cave is a vast, subterranean chasm, existing in the interior of Kentucky, Western Hemisphere, about the parallel of 38 deg. north latitude, and meridian 87, and is known not only for its geological interest, but being a spot in the midst of a wide civilization, which contests and stoutly resists the effort to reach it by land, water, or other conveyance." Such succinct and accurate account would have, of course, to undergo revision, should a certain railway, proposed to lead from a certain river to a certain other point a little further southward, ever become what a certain transcendental contemporary would term—*fact*. It gives me, however, no little pleasure to be able to register, for the especial benefit of those interested in the progress of adventure, that the formidable voyage has been accomplished, and that the Mammoth Cave is a vast, subterranean chasm, existing in the interior of Kentucky, Western Hemisphere, about the parallel of 38 deg. north latitude, and meridian 87, and is known not only for its geological interest, but being a spot in the midst of a wide civilization, which contests and stoutly resists the effort to reach it by land, water, or other conveyance." Such succinct and accurate account would have, of course, to undergo revision, should a certain railway, proposed to lead from a certain river to a certain other point a little further southward, ever become what a certain transcendental contemporary would term—*fact*. It gives me, however, no little pleasure to be able to register, for the especial benefit of those interested in the progress of adventure, that the formidable voyage has been accomplished, and that the Mammoth Cave is a vast, subterranean chasm, existing in the interior of Kentucky, Western Hemisphere, about the parallel of 38 deg. north latitude, and meridian 87, and is known not only for its geological interest, but being a spot in the midst of a wide civilization, which contests and stoutly resists the effort to reach it by land, water, or other conveyance."
